WORK EXPERIENCE

Product Designer

— 2020 – till date

- Tata Consultancy Services being one of leading IT, consulting and business solutions organizations , got an opportunity to work on multiple projects in different domains like Banking, Logistics and TTH (Travel, Transportation and Hospitality).
- As a Product designer(UI/UX/Visual) my major role is to understand the product requirement from business analysts and clients in order to create user flows, wireframes, interactive prototypes, usability tests and also to work closely with the development team to help in assets and design review after the development.
- My core responsibilities are:
 - To take ownership of projects, from concept through to completion and Working across multiple project deadlines.
 - To create user-centric designs that can help to improve the user experience and increase customer satisfaction.
- Had also worked on **Metaverse** - Banking domain in creating a **Virtual Reality Banking Environment** incorporating 3D elements within it which touts to be the next gen of banking domain.

Graphic Designer

— 2017 – 2019

- My journey began with 2adpro, a unique global design and technology services company. My major responsibilities had been creating visually rich graphic designs for advertisements, logos, posters, brochures, websites, social media graphics, etc.,
- To create designs in a way that communicates messages effectively and aesthetically.
- Some of my other key responsibilities were collaborating with copywriters, photographers, and other professionals to create well-rounded designs.
- Also ensuring the design elements aligned with the company's brand guidelines and identity and managing multiple projects simultaneously adhering to deadlines.
